JURAJ PALUŠ

IT Business Analyst

palus.dev@gmail.com jurgo.sk github.com/Jurgo88 Bratislava · remote / EU relocation

01 PROFILE

IT analyst with a strong development background and 8+ years in IT. I analyze business requirements, model processes in BPMN and UML and write specifications that developers can actually implement. Because I've built software myself, I can spot technical risks early and communicate directly with both stakeholders and dev teams.

02 EXPERIENCE

2025–2026

IT Application Developer / Kanadevia Inova

- Wrote and optimized SQL queries, data corrections and reports
- Managed data flows between the application, database and external business systems (ERP, payroll)
- Managed user access, roles and system configuration; provided application support to end users

2023–2024

Fullstack Developer / NDS – National Motorway Company

- As part of a 10-person dev team, co-developed an event and workflow tracking system used by **100–250 field workers** across regional centres in Slovakia
- Designed REST APIs in Laravel and integrated them with a Vue.js frontend

2022–2023

IT Analyst / VÚB Banka – Intesa Sanpaolo

- Analyzed business requirements for an internal process-automation system and translated them into technical specifications
- Modelled processes and system design in BPMN and UML using Enterprise Architect
- Coordinated changes and feature delivery with developers and stakeholders in Jira and Confluence
- Identified system issues and proposed improvements to increase reliability

2018–now

Freelance Developer / Self-employed

- Delivered web applications and websites for clients alongside employment; since 2025 focused on SaaS products and AI integrations
- Own the full cycle – requirements, implementation, deployment and post-launch analytics

2018–2021

Frontend Developer / Foundation

- Built responsive web applications using HTML, CSS and JavaScript
- Translated UI/UX designs into functional interfaces in close collaboration with designers

2017–2018

Software Engineer / Accenture

- Worked on commercial projects for an insurance company and an international CMS platform
- Supported infrastructure and ensured stability of deployed solutions

2016–2017

.NET Developer (Junior) / Ensentia

- Developed internal data-management applications in C# / ASP.NET MVC (Visual Studio) with focus on the UI
- Designed and implemented user interfaces with emphasis on usability

earlier — IT Technician – City Library Piešťany (2015)

03 PROJECTS

loqsy.app

Loqsy / Client project

Subscription PWA pairing two user roles – **2,000+ registered users.**

`Vue 3 · TypeScript · Supabase · Netlify`

ePassport System / Client project

Mobile-first web app replacing manual data workflows – structured forms, role-based authentication, admin validation interface.

`Vue · Vuetify · Firebase`

04 SKILLS

Analysis & delivery	Requirements analysis, BPMN, UML, Enterprise Architect, MS Visio, Draw.io, Jira, Confluence
Backend & data	Node.js, Hono, Laravel / PHP, REST API, SQL, Supabase (Postgres, RLS, pgvector), Firebase (Firestore, NoSQL), Cloudflare D1, Python (personal projects)
Systems & support	User & access management, system configuration, SQL data maintenance, end-user support, networking basics
Frontend	Vue 3, TypeScript, JavaScript, Pinia, Vue Router, Vite, Nuxt, Astro, React, HTML, CSS

05 EDUCATION

2026–2027

Master's degree (MSc) – Cloud-Based Software Architecture

VAMK – Vaasa University of Applied Sciences · online · expected graduation 2027

2011–2015

Bachelor's degree – Computer Science

VŠB – Technical University of Ostrava, Faculty of Electrical Engineering and Computer Science

06 LANGUAGES

Slovak – native / Czech – bilingual / English – B2 / German – A1
